Product Description

The Lexar® 256GB High-Performance 800x SDHC™/SDXC™ UHS-I Card BLUE Series is designed to meet the needs of professional photographers and videographers, offering up to 120MB/s read speed and up to 45MB/s write speed for fast and reliable storage. With 256GB of storage, this card provides ample space for your Full HD (FHD) and 4K video capture, ensuring quick transfers and smooth recording. The Class 10, U3, and V30 speed ratings guarantee exceptional performance for high-quality video recording, making it ideal for use in DSLR cameras, mirrorless cameras, and action cams.

Whether you're shooting high-resolution photos or recording 4K video, the Lexar 256GB SDXC UHS-I Card offers the speed and capacity needed to handle demanding multimedia tasks. Built for durability and reliability, this card is designed to withstand harsh conditions, making it the perfect companion for professional photographers and videographers who need fast, durable storage in

the field.

The Lexar 256GB High-Performance 800x SDXC UHS-I Card is perfect for high-speed data transfer, secure storage, and enhanced video capture. Whether you're shooting 4K footage, capturing high-speed images, or transferring large files, this card ensures your digital content is stored efficiently and securely. Ideal for professionals and enthusiasts alike, the Lexar 256GB SDXC UHS-I Card provides reliable, fast storage for your most important media.
